Why AWS certification matters:

- » There's a significant gap between the massive number of jobs available, and the few qualified, AWS certified candidates available to fill them.
- » Among "the big 3 global Cloud providers," AWS is #1 over Azure and Google.
- » AWS leads the way in supporting today's hottest tech trends: Artificial intelligence, data analytics, internet of things (IoT), and edge computing.
- » COVID-19 forced organizations to accelerate digital transformation, moving to the Cloud to support remote work and maintain business continuity. In doing so, the demand for cloud talent has increased significantly.

The demand is growing for certified AWS Professionals.
